

CENTERPOINT RTX

High Accuracy GNSS Corrections

No matter where the job takes you, Trimble CenterPoint RTX keeps you up, accurate and ready for whatever challenges the site might hold.

2cm Accuracy

Precise, repeatable measurements help you get the job done quickly and correctly, the first time, every time.

Global Availability

Satellite-delivered works, even in remote locations and across large geographic areas.

No Setup

No base station and quick convergence means work starts when you step on-site.

Support

24/7 network monitoring and maintenance with around-the-clock customer support.

Reliable Network

Using the newest constellations (GPS Generation III, GLONASS, Galileo, QZSS and BeiDou-III) ensures you keep working without interruption.

Multi-Discipline

Topographic, cadastral, and boundary surveying; stakeout; exploration; seismic; mobile mapping; and more.
