

VRS NOW

Virtual Reference Station Corrections

No matter the challenge, Trimble VRS Now gives you the trusted, proven accuracy to work fast and efficiently through whatever the job throws your way.

Instant Convergence

With instant access to network RTK corrections and no base station to set up, you can start working the second you are on the job site.

Multi Constellations

Work more reliably in challenging GNSS environments, such as urban multipath or under tree canopy using the newest constellations (GPS Generation III, GLONASS, Galileo, QZSS and BeiDou-III)

No Interruption

Our reliable network uptime ensures you're never losing valuable time waiting for corrections.

Easy to Use

No learning curve. Precise positioning is as simple as connect, correct and measure.

Accuracy

Precise and repeatable, VRS Now pinpoint accuracy lets you get it right, the first time and every time.

Support

24/7 network monitoring and maintenance with around the clock customer support.
